<sup>1</sup> Note that a placement in the Qualifications Framework according to this concept does not mean that the programme is a degree programme or that it corresponds to a full ordinary education at the same level. Programmes that have undergone level assessment according to this concept are still not part of the ordinary education system, and are not subject to ministerial supervision. The level assessment was carried out in accordance with the current Accreditation Act, Consolidating Act no. 173 of 2 March 2018 and *Vejledning til niveauvurdering* (level assessment guidelines).

## **The overall goals for learning outcomes of the programme have been described on the basis of knowledge, skills and competence**

*Danish Shipping Education is a 2-year, industry-oriented education equipping trainees with fundamental knowledge within shipping.*

*Danish Shipping Education offers a general introduction to the shipping industry, with teacher teams having practical and or relevant and specialized knowledge and experience within the shipping industry and the course they teach. Danish Shipping Education furthermore enhances great opportunities for networking within shipping across the world.*

*The education structure encompasses a mix of scheduled teaching sessions with Danish Shipping Academy and traineeship at a shipping related company based in Denmark or abroad. Danish Shipping Education is designed for a lifelong investment in the trainee's education in shipping, introducing the trainees for a global industry, with multiple career variations and a solute first stepping stone into a professional business network.*

Danish Shipping Academy's goals for learning objectives for Danish Shipping Education are:

Knowledge:

*The trainees –*

- *Must have knowledge about practice and application of methodology and theory in relation to the courses offered through teaching sessions at Danish Shipping Academy. The trainee must relate the relevance of courses and their content to their occupational fields when working in a trainee position at a shipping related company.*
- *Must be able to understand practice and the centrally utilised theories and methods, as well as how to apply them when working in the maritime industry within the shipping related companies where the trainees are employed.*
- *Must have knowledge of the key stakeholders in the maritime industry, their occupational roles and how they operate and are connected.*
- *Must have knowledge of the key concepts and terminology relating to their occupational roles within the maritime industry which they use in their daily work practices.*
- *Must be able to understand the basic commercial, operational and regulatory frame-works in the shipping industry.*
- *Must have knowledge of the fundamental legislation within the maritime industry and its relationship to international trade, the shipping industry and their occupational roles.*

Skills:

*The trainees –*

- *Must be able to apply and combine central methods and tools relating to the maritime industry during daily work as a trainee and be able to utilise these in working processes in practice.*
- *Must be able to assess practice-based issues and adjust working procedures and processes based on this assessment within daily work scenarios.*
- *Must be able to communicate practice-based issues and potential solutions to internal and external colleagues, clients and collaborative partners.*

- *Must be able to identify issues and challenges in daily work tasks and apply concept, principles and procedures in order to resolve these issues.*
- *Must outline and examine emerging trends and technologies in interdisciplinary subjects and apply them in daily work tasks and identify potential opportunities with the company.*

Competence:

*The trainees –*

- *Must be able to participate in developmental working processes and/or interdisciplinary working processes in the company.*
- *Must be able to manage, plan and take responsibility for daily work tasks while doing so in collaboration with colleagues and with a professional approach.*
- *Must be able to attain new knowledge, skills, and competences relating to the maritime industry in structured contexts.*
- *Must take responsibility for learning at one's own place of employment and utilise theory from Danish Shipping Education's teaching sessions in practical work solutions and utilise the opportunity to have constructive dialogue with their mentor.*
- *Must be able to present and identify different options and different points of view when handling work tasks.*
